

The Total Economic Impact™ of Microsoft Power Platform

Find out how to get substantial return on investment (ROI) when you enable citizen developers, your organization's business users with little to no development experience, to build and collaborate with pro developers on solutions using low-code tools on Microsoft Power Platform.

Read **The Total Economic Impact™ of Microsoft Power Platform**, a 2021 commissioned study conducted by Forrester Consulting, to discover the cost savings and business benefits a company can expect over three years, including:

- 502 percent ROI.
- USD \$25.92 million in net present value (NPV).
- Investment payback in 11 months.

Yes, I want this study

Here's my information.
